PERSONAL PROJECTS

Twitter Sentimental Analysis (07/2021 - Present)

- In this project, I worked as a backend developer and database manager.
- Our team takes the user's desired search and analysis the data in positive, negative, neutral forms for easy understanding.
- for easy understanding, we used graphs and a pie chart.

Flask Web (12/2021 - 12/2021)

- I created a website using Flask and mongodb to render and store data, render the pages, and display the data.
- I used Riot Developer API to Fetch the Valorant game data including all the characters, weapons, skins, and character powers.
